La volontà di offrire ai coltivatori di lavanda stoechas delle varietà sorprendenti per la bellezza del fiore e la robustezza della pianta ci ha condotto ad uno scrupoloso lavoro di ricerca genetica a livello mondiale, che è sfociato nella selezione delle varietà che compongono la nostra serie "Lavinia", marchio registrato dal Gruppo Padana.

LAVINIA
Una stoechas robusta per vaso 14-16 e oltre. Precoce in fioritura. Per vendite precoci in primavera. Invaso consigliato dalla settimana 30 in poi. È avvantaggiata da concimazione con N-ammoniacale nel periodo estivo.
Purple: varietà di punta della serie, fiori enormi che tollerano bene la rugiada, rami legnosi che sostengono bene il fiore, buona ramificazione, preferisce spuntatura tenera. Si mantiene sana al centro della pianta.
White: vegetazione più erbacea delle altre varietà.

Our will to offer to Lavandula stoechas growers amazing varieties for flowers beauty and plant sturdiness led us to a meticulous work of genetic research on the global market, which resulted in the selection of the varieties in our series "Lavinia", registered trade mark by Gruppo Padana.

LAVINIA
A sturdy stoechas for production in pot 14-16 and bigger. Early flowering, suitable for sales in early spring. Advised potting time is from week 30 onwards. It takes advantage by N-ammoniacal feeding during summer.
Purple: top pick variety in the series, very big flowers dew tolerant, woody branches which hold very well the big flowers, good branching, requires soft pinching. It keeps healthy in the center of the plant.
White: less woody compared to the other varieties.

Lavinia
Lavandula COMPACT

128 | 22-40

LAVINIA COMPACT
Varietà di stoechas compatta, molto ramificata, per vaso 12-16 con trapianti dalla settimana 34 alla 40. Molto precoce in fioritura. Rimuovere i boccioli nella fase di accrescimento vegetativo. Richiede concimazione con N-ammoniacale nel periodo estivo e N-nitrico nel periodo autunno-invernale. Fioritura continua.

LAVINIA COMPACT
Compact variety, with many branches, suitable for pots 12-16, potting weeks 34-40. Very early flowering. Remove flower buds during vegetative phase. Needs N-ammoniacal feeding during summer and N-nitric feeding in autumn-winter time. Continuous flowering.
