Il profumo

Il profumo deriva dagli oli essenziali che si sviluppano nei fiori quando sono maturi o dotati di polline
I fiori ancora giovani o troppo vecchi invece non profumano

*The scent comes from the essential oils which develop in the flowers, when these are mature or bearing pollen
However, very young or old flowers have no scent*

Der Duft der Blüten entsteht durch ätherische Öle, die sich während des Reifeprozesses der Blüte bilden oder solange diese Blütenpollen tragen
Junge oder sehr reife Blüten duften hingegen nicht

Il profumo

La pianta emana un profumo intenso nelle giornate di sole, durante le ore fresche del mattino o se ha molti fiori maturi. Può verificarsi che i fiori di un 10-20% delle piante di una di queste varietà non emanino profumo

The plant gives off an intense scent on sunny days, during the cool hours of the morning or if it carries many mature flowers. The possibility exists of 10-20% of scented variety plants not giving off any scent

Die Pflanze verströmt einen besonders intensiven Duft an sonnigen Tagen, in den kühlen Morgenstunden oder wenn sie mit zahlreichen reifen Blüten besetzt ist. Es besteht die Möglichkeit, dass 10-20% des Pflanzenbestandes von Sorten, die normalerweise duften keinen Duft abgeben

PLEIN AIR collection

MIDI

**Serie e colori selezionati per una miglior resistenza dei fiori a pioggia e freddo
Ideali per aiuole, mantengono un bell'aspetto anche in condizioni invernali
Resistono bene su balconi e in ambienti esterni con temperature vicine allo zero**

*Series and colours selected for greater resistance of the flowers to rain and cold
Ideal for bedding, still look good even in winter conditions
Great for balconies and other outdoor positions, can withstand temperatures close to zero*

Ausgewähltes Farbspektrum mit einer höhere Widerstandsfähigkeit der Blüten gegen Regen und Kälte
Ideal für die Beetbepflanzung, da die Pflanzen auch bei winterlichen Bedingungen attraktiv aussehen
Ausgezeichnet geeignet für die Bepflanzung von Balkonen und anderen Standorten im Freien, da sie Temperaturen bis knapp über null Grad vertragen
